## 1. EXECUTIVE SUMMARY

Deliverable D6.3: PROJECT WEBSITE contains a description (plus link) and a screenshot of the OH SURVector project website.

## 2. DESCRIPTION OF THE OH SURVECTOR WEBPAGE

A multi-language project website was created as a tool for internal and external communication and as a source to general information on the project and to results. The website is hosted by the coordinator AGES and is accessible under: <https://www.ages.at/ohsurvector>.

Within the OH SURVector Consortium, each Partner will also hosts their own page, but the information on the project will be aligned and linked among each other. This will be regularly updated with information and additionally supported by press releases in case of emergency.

Useful materials about vector borne pathogens previously developed by Partners of OH SURVector Consortium as well as material from external collaborators will be hyperlinked. Materials produced by the OH SURVector Consortium will be uploaded directly on the OH SURVector website.

All partners will be responsible for providing material for the website (this includes any country activities taking place in OH SURVector countries and information/educational material).

All partners are responsible to create links of the OH SURVector to their home Institute's websites.
